

WEIGHPADS

Weighing as little as 18 kg these weigh pads are convenient, portable, and versatile. Constructed of high strength aluminium, these electronic pads will provide years of reliable, maintenance free service. Pads are available with either an integrated or a remote indicator. Versatility is greater enhanced as the pads can be used individually or in pairs. With one pad recessed, they can be used as an accurate axle weigher. Two, four, or six pads can be hooked up for precise weighing of multiple axle vehicles or as a portable platform scale.

Features

- Lightweight construction allows single person setup and operation.
- Low height means low ramp angle and a high degree of accuracy.
- Avoid both heavy fines and increased insurance costs.
- Wide platform will accommodate dual tires easily and safely.
- DF2000 digital readout will automatically sum axle weights.
- Non-skid pattern ensures maximum grip in wet or snowy conditions.
- Readings in either kilograms or pounds.
- LED display ensures high visibility in all conditions – including sub zero.

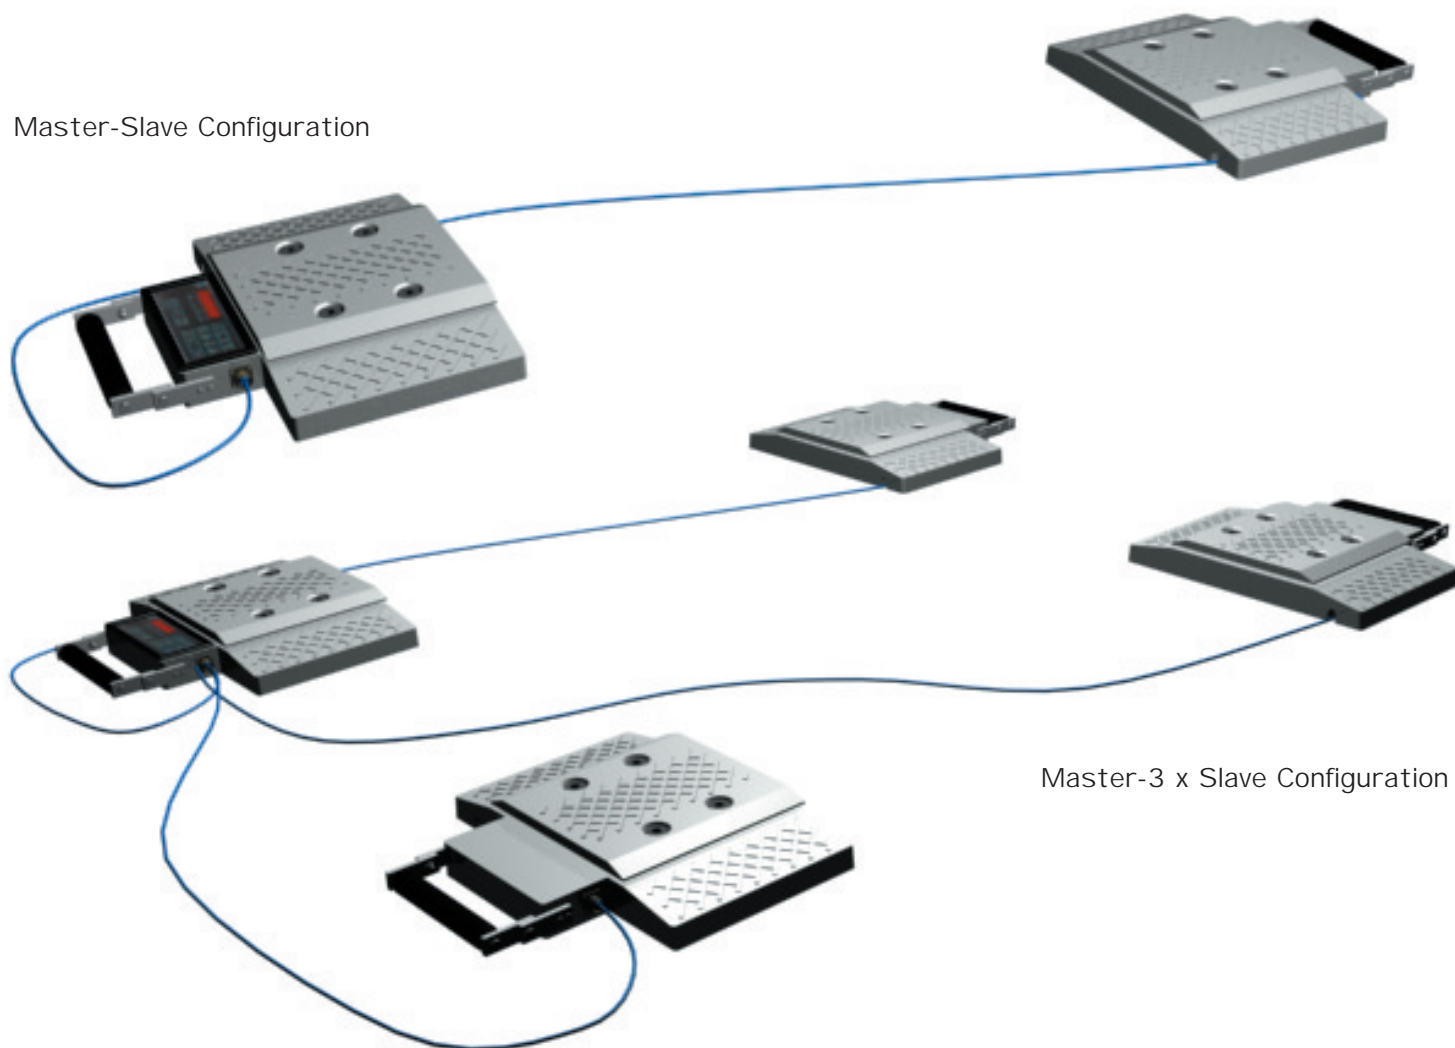

Easily weighs small vans to trucks
